Education

Engineering Degree – ÉTS Montréal *Sept. 2022 – Feb. 2027*
Major in Computer Science

- **Member of the finance club** *Sept. 2025 – Present*
  Market trading platform
- **Exchange semester in Taiwan** *Feb. 2025 – June 2025*
  Focused on machine learning

Entrepreneurship Program – HEC Montréal *Jan. 2024 – Apr. 2024*
Building a startup within an incubator

Degree in Computer Science – Université Claude Bernard Lyon 1 *Sept. 2020 – June 2022*
Two-year technical degree in Computer Science (DUT)

Experience

Data analytics project management intern for Dior's supply chain *Sept. 2026 – Feb. 2027*
Maison Dior (LVMH) – Paris, France

- **Gathered requirements** from **business teams** and coordinated with the **IT team** to deliver them.
- Acted as **Product Manager (PM)**: **prioritization**, coordination, **specifications**, documentation, **testing** and support.
- Integrated **AI tools** to **automate supply chain processes** and save time for the teams.

Artificial Intelligence Research Lab Intern *Sept. 2025 – Dec. 2025*
Croesus Fintech – Montréal, Canada

- Developed ML/LLM pipelines for portfolio analysis.
- Trained models with **Unsloth** and **PyTorch**, orchestrated through **Databricks** and **MLflow**.
- Improved model accuracy by **17%** and deployed it to the cloud.

Co-founder and Director of an IT services agency *Mar. 2023 – Aug. 2026*
Otopio – Montréal, Canada

- Translated client needs into scalable technical solutions powered by **AI**.
- Built products in **TypeScript**, hosted on **AWS**, with **Power BI** dashboards.
- Worked with **20+ clients** and maintained applications used by thousands of users.

Data Analyst Intern at a fintech startup in California *Sept. 2023 – Dec. 2023*
Finance It Forward – Los Angeles, United States

- Automated financial data analysis for loan comparison.
- Extracted and classified data using **NLP** with **Hugging Face**, and built a **RAG** system with **LangChain**.
- Fully automated analyses that took employees up to **8 hours per week**.

Technical Skills

Artificial Intelligence: Fine-tuning, Unsloth, NLP, PyTorch, TensorFlow, LLM, Hugging Face, scikit-learn, RAG, vector databases, LangChain, LangGraph, AI agents, OpenRouter, MLflow, MLOps

Data: Pandas, NumPy, SQL, data preprocessing, ETL & data pipelines, web scraping, BigQuery, Snowflake, Databricks, Jupyter Notebook, Power BI

Code & Automation: Python, TypeScript, JavaScript, Go, Java, C#, C, C++, PHP, VBA, React, Docker, Git, PostgreSQL, MySQL, Firebase, AWS, Linux/Unix

Personal Projects

Medic.pub: Medical practice management software
medic.pub 2026

- **Context:** Contract work carried out for Otopio.
- **Goal:** Connect medical devices to a practice management software.
- **How:** Built an **ETL** pipeline to collect raw device data, clean it, transform it and send it to the cloud.
- **Result:** Integrated two data sources (**HL7** and **EDFv2**) normalized to the **FHIR** standard.

AlgoETS: AI-powered trading automation
algoets.etsmtl.ca 2025

- **Context:** Project for the ÉTS finance club.
- **Goal:** Let users generate trading automation models tailored to their own portfolio.
- **How:** Combined statistical trading models with an **LLM** that converts natural language requests into model parameters.
- **Result:** Working demo and features integrated into a platform with **100+ users**.

Oragius: Water level prediction
oragius.ca 2025

- **Context:** Research project with an ÉTS professor, entrepreneur in residence at Centech.
- **Goal:** Predict water levels from a statistical dataset.
- **How:** Time series forecasting with an **LSTM** (**TensorFlow**, Python) on historical data.
- **Result:** Reached **59%** accuracy on the test dataset.

MTARegion: User behavior analysis
mtaregion.com 2024

- **Context:** Freelance work for a tourism company offering users discounts at local businesses.
- **Goal:** Analyze user behavior data and assess profitability.
- **How:** Joined financial data (**Stripe**) with user data in **PostgreSQL** to feed dashboards.
- **Result:** Analyzed and segmented data from **10,000+ customers**.

Coordia: Patient data collection
coordia.ca 2024

- **Context:** Contract work carried out for Otopio.
- **Goal:** Collect patient data for an orthopedic practice management software.
- **How:** Set up **PostHog** analytics and built custom **BI** dashboards tailored to the product.
- **Result:** **50,000+** data points processed, analyzed and categorized every month.

Nautilus OS: Simulated operating system
github.com/samihanine/nautilius-os-batch 2016

- **Context:** Project carried out over more than a year, at age 13–14.
- **Goal:** Simulate an operating system in the console.
- **How:** Developed a memory system in **C** and automation scripts in **VBA** and **Batch** to control the computer.
- **Result:** Built **8 complete applications**, including a file explorer, a text editor and peripheral access/control.
